

This is a safety resource. Standard AM/FM radio does not provide traffic reports as a dedicated service so you have to wait 10 minutes or so to hear an update... too much time... In 10 minutes I am stuck in traffic with no way out just because i'm waiting for the report!
I want to keep my XM traffic reports.

As a secondary note, my local station listing has not changed. I tune in my favorite FM broadcast on my commute...

Chris
